

## Personal Property Checklist

SmartFormz has detailed a list of personal property and items below to help make the division of these items as effortless as possible for each spouse. Put a checkmark in the appropriate column (Wife/ Husband) to ensure that the items wanted will be properly divided between both spouses.

If certain items need further consideration, you may leave them blank, fill them out later at your own convenience, or write a comment in the "Other" column.

This forms only purpose is to make the division of property easier, and to make sure nothing is left out for a debate later on.

---

We have gone through all personal property together and have divided it amongst ourselves without conflict.
